EDUCATION

Monmouth University

B.A. Computer Science | GPA: 3.53

September 2024 – May 2026

Brookdale Community College

A.S. Computer Science | GPA: 3.16

September 2021 – May 2024

EXPERIENCE

Monmouth Medical Center – Patient Access Representative,

Patient Access Representative

July 2023 – Present

Long Branch, NJ

- Collected and verified patient demographics, insurance information, and consent forms during check-in, ensuring data accuracy and completeness across all patient encounters.
- Processed co-pay and balance collections while strictly adhering to HIPAA regulations, preventing unauthorized disclosure of protected health information.
- Utilized Epic EHR to register and update patient demographic and insurance information, coordinating with clinical and billing departments to ensure accurate documentation.
- Communicated financial responsibilities and insurance benefits to patients and families at the point of service, ensuring transparency and reducing payment-related confusion.
- Assisted in orienting and training newly hired Patient Access staff on registration workflows and compliance procedures.
- Collaborated with IT staff to troubleshoot and resolve front-end system issues, minimizing help desk ticket submissions and reducing operational downtime.
- Leveraged deep familiarity with Epic Prelude workflows to identify registration process inefficiencies and communicate end-user needs to IT staff.

Monmouth Medical Center – IT Internship

Information Technology Intern

August 2025 – October 2025

Long Branch, NJ

- Shadowed senior IT staff and resolved end-user help desk tickets across clinical and administrative departments, gaining hands-on exposure to enterprise healthcare IT operations.
- Observed and documented active IT initiatives on the Epic platform, contributing to system configuration awareness and building foundational knowledge in healthcare IT security and HIPAA-compliant data protection.
- Assisted with user account management tasks, including creating, updating, and deactivating user profiles in accordance with organizational access control policies.
- Supported the IT team in maintaining application configuration records and updating internal documentation and training materials for end-user support procedures.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C++, SQL

Healthcare IT: Epic Platform, HIPAA Compliance, Anti-Malware Security, IT Support

Developer Tools: VS Code, Eclipse, NetBeans, Microsoft Office, Microsoft Excel

PROJECTS

Snippet — React, Vite, Tailwind CSS, Express, MongoDB (Live)

May 2026

- Led a 3-person team to build a community-based communication platform with 28 reusable React components and 26 pages, solving the lack of accessible peer-learning tools on campus; deployed live at snippet-gp.vercel.app
- Implemented real-time video, audio, and messaging using WebRTC and Socket.IO, enabling low-latency peer-to-peer signaling and stable media stream handling for 50+ concurrent users.
- Coordinated full-stack development, code reviews, and deployment via Vercel, reducing release time and ensuring a reproducible, scalable architecture.

ShelfLife — Java, JavaFX, MySQL (GitHub)

May 2024

- Engineered a full-stack Order Management System with JavaFX and MySQL for real-time order tracking, inventory updates, and purchase history, handling 100+ daily orders.
- Designed interactive interfaces with robust error handling and input validation, reducing processing errors by 40%; optimized SQL queries, improving response times by 30%.

ACHIEVEMENTS

National Cyber League (NCL) — Challenge Coin Recipient

Fall 2025 & Spring 2026

- Contributed to Monmouth University's #2 national ranking (out of 500+ universities) in the NCL Fall 2025 Power Rankings (Standard Bracket).
- Ranked top 4.3% individually and top 2.6% as a team (Spring 2026); top 5.0% individually and top 2.6% as a team (Fall 2025) across 7,000+ competitors.
- Applied skills in cryptography, network analysis, log analysis, and digital forensics across individual and team competitions.
