EDUCATION

Monmouth University

Graduated

Department of Computer Science

September 2024 - May 2026

GPA: 3.53

Brookdale Community College

Graduated

Department of Computer Science

September 2021 - May 2024

GPA: 3.16

EXPERIENCE

Monmouth Medical Center

IT Internship

August 2025 - October 2025

- Supported the development and testing of a clinic application on the Epic platform, contributing to system functionality and user experience.
- Assisted in implementing anti-malware security measures to safeguard patient data and ensure compliance with healthcare IT standards.

Monmouth Medical Center

Patient Access Rep

July 2023 - Present

- Ensured accuracy and security in updating confidential health records in compliance with HIPAA standards while optimizing financial workflows through precise co-pay and balance collections.
- Troubleshoot a system user issue and collaborate with IT to resolve a technical error, bridging clinical operations and technology support.

PROJECTS

ShelfLife — Java, JavaFX, MySQL (Github)

May 2024

- Developed Order Management System: Engineered a full-stack system with JavaFX and MySQL for real-time order tracking, inventory updates, and purchase history, handling 100+ daily orders.
- Enhanced User Experience: Designed interactive, user-friendly interfaces and implemented robust error handling, input validation, and real-time data handling, reducing processing errors by 40%.
- Optimized Code and Database Integration: Created a modular, scalable code structure with efficient SQL queries, foreign key constraints, and smooth troubleshooting to maintain data integrity and performance, improving query response times by 30%.

Pinochle Card Game — Java, MySQL (Github)

May 2023

- Developed Interactive Game Mechanics: Implemented advanced game features using JavaFX, enhancing user engagement with dynamic and interactive graphical interfaces.
- Built Data Management System: Designed a robust MySQL-based system to efficiently handle game data, player statistics, and historical records, supporting up to 5,000+ records.
- Integrated Secure Database Operations: Utilized JDBC to ensure seamless, secure, and reliable interactions between the game and the database, achieving 99.5% uptime.

TECHNICAL SKILLS

Languages: Proficient in Java, Python, JavaScript, C++, and SQL.

Developer Tools: VS Code, Eclipse, NetBeans, and Microsoft Office.
